Editorial

The whole days are days of the workers' fight!

The fight continues, in spite of the betrayals that we witnessed for said "syndicalists" in the government.

Companions! As always we maintain the fight that many already abandoned for disillusion, fear, betrayal or any torn excuse behind which they hide.

While some put the family as difficulty, others struggle exactly for they defend their families. As they remind the Arabs, when we want to do something, we do, when we don't want to do, we made excuses. Enough of conversation, we are going to the finally!

The fight for the reduction of the work day, that many found overcome, it returned!

The losses of the workers' conquests, the progress of the voracious capitalism brought the old exploration practices exalts without control, to the pleasure of the bosses, managed by the State, his torturer and oppression partner and exploration.

A terrible one "déjà-vu vu" for our class!

Now it is common to impose daily days to the workers, without any warranty and on the dismissal threat if not to do more the such hours the.

A real fact is the return the days of work of 60 and 80 weekly hours and still to hear "complaining than, you have work and it receives wage! He/she has people that would do plus, for less!"

We imagined that they are referring to put metal chains and we return the rush, since he/she had eaten and clothes assured, which now a salary earner badly gets to have for itself and for his family!

We know that will only be able to change this situation united, our class in a solidary way fits, to compose a block of defense of our needs and to move forward for our emancipation, it struggles in the which the revolutionary syndicalism is an important base. The fight is daily and without parties, only united we will be able to do her.

Organized, we struggled!!!

Our fights

Increase of the job and improvements in the work conditions.

1) Actions against unemployment

To avoid the unemployment or that this is a constant threat against our working class, it is done indispensable the equalitarian distribution of the job among all the workers.

To get that, we defended the following:

- Maximum day of 30 weekly hours, without any type of modifications for having supposed needs of the company.

The day reduction should not be redundant in salary losses, like this the work will stop being a privilege to convert in the real right that the workers have, creating job to pair that is reduced the day;

- Elimination of overtimes, bank of hours, several jobs, double days, triple of work, since they are flexible modalities of the work as the objective of enlarging the workers' exploration;

- Vacations of 31 days run a year;

- Reduction of the retirement age for 55 years, both sexes, with 100% of the wage.

You also contribute!!!

This fight is of all of us, alone nobody makes anything!!

SE O SISTEMA NÃO MUDA,
MUDE DE SISTEMA.

Combative Syndical action

It is common our companions, for option lack or inexperience in the syndical fight, to question as acting in the unions "officials", mainly in time of election, when they appear the supporting of several slopes and each one presents a program, interesting theories for the category and for the syndical direction in the country. Many until they cogitate the possibility to participate in some of them.

As revolutionary syndicalists, we also have our conceptions, theories, theories and action programs, that are usually contrary to the official syndical model, to the supporting models and their theories.

With that she can already establish the relationship type that we have with the officials unions. We have that you denounce them as a farce, an illusion that transforms our class in "maneuver mass", or simply the "mass"

as so much likes to speak the Marxist authoritarians and degenerative enclosures in general.

Of course should not participate in the electoral process of an union "official" for the simple fact that he is ultimately a conservative element of the current labor relationships, a submissive bureaucratic element the justice of the work, controlled by the dominant class.

And in these periods we should do is to incite our association campaign to the revolutionary syndicalism, that it is the breaking with the yellow syndical practices, reformists been celebrated by the Fascist Getúlio Vargas, rescuing the combative syndicalism of the beginning of the century XX.

Many companions question if they are not practical obsolete and that you/they don't correspond to the current moment.

It is necessary to write that the progresses and the workers' conquests were made in this period are resulted direct of "obsolete practices". THE ONE that the Fascist Vargas did when signing CLT was to gag the workers and to maintain on them control.

Of there for here, we struggled to break the muzzle and to leave of the royal control of the state, faithful squire of the bosses. Maintaining the focus in the main objective of our fight, our emancipation.

And for that, we didn't need philanthropy

and nor of the practice of reforms preached and done by all the central ones syndical, that you/they made a pact to silence the workers' mouth.

Our fight is the end of the exploration and oppression. The official unions and their parties don't assume in practice that, especially because they would lose yours wins state bread, although the great taxpayers are explored and oppressed for who should guide and to help in the fight, but they are just stolen by yours "representatives". The cases of deviations, tips, boxes two, extortions in the unions don't stop!

Companions, let us talk with our class, in our work places, denounce the maneuvers supporting of the unions, their false promises and his/her total apathy before the state and of the bosses. We should always struggle with our category, with our class, in a solidary way, the one that doesn't mean fight with the "official union" and nor we be chosen ourselves even. We want the unions reformists' end, of the yellows, of the parties and you don't strengthen them, participating in his/her structure.

A blank vote foil, with a proposal of the revolutionary syndicalism, going direct in the central points, without practices of attendance, without reforms, it is that that we can do, showing that only with our union, with the working solidarity it is will really be able to do a worthy fight and that the revolutionary syndicalism offers. That is the campaign, that is the fight, organization and emancipation of our class for us same. The rest healthy lies and illusions.
